Narrative Explanation

At the time of inspection facility is clean and organized. All animals have been moved into downstairs room that has been renovated and is now completely impervious to moisture. FRP board has been added to the walls, vinyl floors installed, vinyl baseboards installed, FRP covering doors and door frames, PVC moldings installed, and vinyl coated storm door replaced old rusted door, ceiling fan added for increased ventilation, moved air return just outside the room for better circulation, added thermometer to enclosure area, and installed new heat/air duct work. Front play yard moved to back yard. Fencing added to deny animals access to wood and gravel added to bare dirt areas. Plans are to add on to this play yard by adding additional fencing and gravel in the future. Concrete and rock has not yet sealed but plans are in place to seal these when weather improves. Materials were available on hand for completion of this project. Seal concrete and rock. (0203). Wooden bench removed from outdoor play yard.

Animals are now allowed continual access to water. Medication logs have been implemented and overall are well documented. Medication logs should also include time and initials of who administered the medication. (0101). Origination documentation is lacking on a few animals available. Implement and maintain origination documentation as was discussed at the time of inspection. (0101). Discussed 19A 32.1 with Ms. Teachout.

Population size is still larger than is desired. Population size should remain at 1:10. (0204).

Overall I am very pleased with the progress of this facility. No sign of illness/injury in the general population. Animals having chronic health conditions are continually vetted and are well documented for the care provided to them. All animals have been recently groomed and look good.

Okay to license this facility.
