Narrative Explanation

Improvements from the previous inspection include;

1) Window seals in the meet and greet rooms have been replaced with Trex and are now impervious to moisture.

2) Walls in the meet and greet rooms have been covered with FRP board and are now impervious to moisture.

Good work here.

Inadequacies noted at the time of inspection include;

(0204)

1) Facility has implemented a new outdoor play yard. Wood has been used in this play yard to secure fencing. Remove wood from play yard. Posts that are located outside the play yard may be covered rather than removed.

(0203)

1) Gravel pathway in the new outdoor play yard is less than 6" deep. Other areas are bare with patches of grass. Areas at the entrance gate to each play yard are bare dirt and in several areas are mud. I have suggested graveling this entire area in order to keep the area well maintained and deny animals access to bare areas of dirt. Reseeding is an option however in the smaller areas this may be more difficult to maintain due to high traffic.

This facility has an existing play yard that is all gravel. Please use the existing play yard and do not use the new play yard until the new play yard is brought into compliance and approved for use.

All animals in the facility appear healthy and vibrant. Records are available for all animals requested. Temperature is ambient. Food is appropriately stored. No other inadequacies were noted at the time of inspection.
