Narrative Explanation, if needed

Todays inspection was for a follow-up from Jan 22, 2013 inspection. The following inadequacies are still in need of being addressed: (0202, 0204) walls in kennels throughout the facility and the outside kennels are in need of being painted. Paint is chipping and this causes a health hazard to the dogs as well as causing the wall to not be impervious to moisture. Door frames throughout facility need to be sanded and repainted to cover rust. (0202) Chain length gates are rusted in B hall and G hall. These need to be replaced/repainted. (0210) All dogs/cats kept longer than 15 days must be vaccinated for rabies if over 12 weeks. There were numerous animals that have been

Narrative Explanation, continued

there over 15 days without rabies vaccination. Litter boxes in cat adoption area didn't not have enough litter to cover the bottom of the boxes. This was addressed again with employee during my inspection.

Marsha has addressed the need for painting to be done to the county maintenance dept over and over. Since last inspection only 1 row has been painted. Again this can pose a health hazard to the animals and needs to be addressed immediately.

New inadequacies that need to be addressed are as follows: (0203) cracks in concrete need to be caulked in outside play areas. In the B hall and outside feral line of G hall had dogs in enclosures that had not been dried completely before putting dogs back in allowing dogs to get wet. (0201) be sure that all exhaust fans are kept clear of hair, dust and debris. Continue to sand down corners of resting boards as needed in dog enclosures.

Cat rooms are becoming overcrowded. Overcrowding increases spread of upper respiratory infections and other diseases among the cats. This causes problems for the employees to maintain the cleanliness of the areas.

Overall facility appeared cleaner and minimum odor detected. Dogs in adoptable areas appeared healthy and content. Will follow-up in 90 days.
