Narrative Explanation, if needed

Follow up inspection from June 29, 2015 disapproved inspection. The following items are still in need of being addressed:

1) (0204) Painting of the floors in all kennels needs to be completed as paint is chipping throughout. Painting had been started when I was here in June but no areas have been painted since that inspection.

2) (0203) Concrete work has began. Concrete has been busted up and removed from the outside of B hall and on the side of the outside of C. This has been poured again but does not have a drain installed. The drain on the end of the kennels on C side has been poured except about 6" right at the pipe (see pictures).

Narrative Explanation, continued

This area is still catching debris instead of going down the drain. Concrete contractor was here at time of inspection and he stated he would complete this section today;

3) There have been no cross contamination barriers poured in either kennel B or C. We discussed using block for this instead of concrete. The contractor has agreed to do one kennel and contact me to look at before completing all of the kennels to ensure this method is acceptable;

4) All new concrete poured and new concrete to be poured must be sealed.

The following new inadequacy needs to be addressed:

1) (0204) Chain length on outside kennels in kennel A need to be repainted/replaced as they are rusting therefore they are not impervious to moisture and cannot be properly sanitized.

The following improvements have been made:

1) Hair and debris have been cleaned out of outside kennels along the fence lines;

2) Overall cleanliness has improved and no odor present;

3) Records/med charts were intact on all boarders.

This inspection is being approved being that concrete work has begun. I will follow up with the contractor once he calls to see the cross contamination barrier trial and after that I will follow up within a month. At that time drains and painting should be completed. We will then check progress of cross contamination barriers and set a completion date for these. A disapproved inspection could result if these areas are not addressed within this time period.
