Narrative Explanation

At the time of inspection facility is clean and well maintained. Records are in order and food is appropriately stored. Isolation is intact. No sign of illness/injury in the general population.

Inadequacies noted include;

1) Outdoor enclosures lacking cross contamination barriers. Implement cross contamination barriers that prevent waste water from entering adjacent enclosures. (0204). Request written time line for when this improvement can be complete.

No other inadequacies were noted at the time of inspection. Ventilation is well achieved at this facility. No odor detected. Facility is in the process of repainting walls throughout the building and sealing cracks as they appear in the floor. A contractor has been contacted regarding increasing the perimeter fencing from 4' to 5' tall and having wooden gazebo covered with material that is impervious to moisture. Overall this facility is very clean and well within compliance with the AWA. Keep up the good work here.

Provided facility with a copy of the Q&A regarding 19A 32.1.
