Date May 28, 2013

TO: All Antifreeze Manufacturers and Registrants

FROM: Ronald Willett, Lab Technical Director

SUBJECT: Registration and Sale of Automotive Antifreeze/Coolants in North Carolina for the Fiscal Year 2013 / 2014

The North Carolina Antifreeze Law of 1975 requires submitting application for registration by **July 1. The annual license and inspection fee is \$500.00 per brand.**

Steps for product registration for the fiscal year 2013 / 2014 are as follows:

1. Forms for submitting fiscal year 2013 / 2014 applications are enclosed. If additional forms are required, please photocopy as needed. Submit new application forms completely filled out, **in triplicate**, for **each brand**. **DO NOT photocopy and resubmit last year's application. Photocopies of old registration forms will be returned, thus delaying registration.**
2. Submit a **one-gallon sample of each brand** of antifreeze which is representative of the composition of the product as it will appear in the North Carolina market. **Please note the address listed on page 2 under Samples submitted when sending the one gallon sample.**
3. **Every application must have a label attached** representing the product to be registered. Submit one specimen **label for each size** of container (**one quart, one-gallon, five-gallon, and 55-gallon**) as it will appear in the North Carolina market. This should be either a paper or plastic film label. If lithographed containers are used, submit a photo static copy or other facsimile of the full labeling. Photostats or facsimiles should fully indicate color designations on the label.

4. Make the check for the total fees payable to the **NC Department of Agriculture and Consumer Services**.
5. Complete applications (application forms, samples, and fees) **must be received by July 1, 2013**

Applications and fee submitted via the U.S. Postal Service should be sent to:

North Carolina Department of Agriculture
1070 Mail Service Center
Raleigh, NC 27699-1070
Attention: Sharon Fields

Samples submitted via Fed-Ex, UPS, Fed-Ex ground, etc. should be sent to:

North Carolina Department of Agriculture
2109 Blue Ridge Road
Raleigh, NC 27607-6432
Attention: Tim Bollinger

Laws and regulations governing antifreeze include, but are not limited to, the following.

- North Carolina Antifreeze Law of 1975
- North Carolina Administrative Code, I Subchapter 9F
- Federal Poison Prevention Packaging Act
- Federal Hazardous Substances Act
- Federal and State Product Safety Laws

It is the registrant's responsibility to understand and abide by these laws and regulations.

For questions concerning registration contact Sharon Fields at 919-733-7366 #4117.

For technical questions contact Ronald Willett, Lab Technical Director at Ronald.willett@ncagr.gov
