CENTIFICATE OF REGISTRATION		CERTIFICATE OI	F REGIS	STRATIO	ON		

This certifies that the applicant named above has registered the brand name listed on this form in compliance with 2 NCAC 42.0500 and is hereby authorized to sell same in North Carolina.

	SI	GNED	
			Director, Standards Division
DATE	, 20	_ REGISTRATION NO	

## **INSTRUCTIONS**

In order to avoid delay in processing this application, the requested information must be complete and accurate. Note carefully the following:

- (1) Furnish complete information requested in the upper portion of the form.
- (2) In No. 1, the brand name always includes the base name and usually includes some type of grade designation or some term which indicates the grade of fuel, for example: "Goodgas Premium", "Goodgas Plus", "Goodgas Unleaded Regular", or "Brand X Diesel No. 2". The registered brand name should be the same as the name displayed on the dispenser. Please note that the same brand name cannot be registered with two different sets of specifications. For example, "Goodgas Unleaded Regular" if registered as a straight gasoline, cannot be registered as a gasohol unless an appropriate additional term is included, such as, "Goodgas Unleaded Regular Contains Ethanol". Biodiesel or Biodiesel Blend shall include a capital B followed by the numerical value of the percentage of biodiesel fuel and ending with the word biodiesel, for example: "Brand X B20 Biodiesel."
- (3) In No. 2, list the guaranteed octane index rating or cetane number that applies to this brand name. Each brand name can have only one octane index rating or cetane number. In the case of diesel fuel, the guaranteed cetane number is the number determined by cetane engine test, ASTM D613, which should not be confused with "Calculated Cetane Index".
- (4) In No. 3, the type of gasoline motor fuel or the grade of diesel fuel should be indicated by placing an "X" beside the appropriate category or grade designation. This is very important since most specifications other than octane index are stipulated in 2 NCAC 42 .0200 and differ by type and grade of fuel. The category "Special Formula Gasoline" is for any fuel, a racing gasoline for example, which is not intended for use in conventional automotive engines. *Any registration application for a fuel of this type must have complete specification data attached to the application.* The specifications for diesel fuel can vary by grade designation and the registered brand name does not always include a grade number.
- (5) In No. 4, applications for blends of gasoline and alcohol, other than those for gasohols (10% ethanol blends), require that all alcohol components and percentages (maximum or minimum as appropriate) be listed. This information should be the same as contained in an applicable EPA. Clean Air Act waiver or other authorized source. Gasohols are required by regulation to contain  $10\pm0.5\%$  anhydrous denatured ethanol.
- (6) The forms must be completed in **triplicate**, **notarized**, and all copies **mailed** to: Standards Division, N. C. Department of Agriculture and Consumer Services, 1050 Mail Service Center, Raleigh, NC 27699-1050. Do not fax the application. Call 919-733-3246 for information.
- (7) Brand name registration is for compliance with N. C. G. S. 119-26 and 2 NCAC 42.0500, and in no way supersedes federal trademark law or state brand name law.
