GENERAL

STATISTICAL REPORTS PROGRAM

The North Carolina Field Office of USDA's National Agricultural Statistics Service compiles current and historic statistics concerning agriculture in the State. Where possible, information most often requested by farmers, the general public, and workers in government agencies are included. Reporting of crop and livestock statistics is a service provided to farmers and others in the State by the National Agricultural Statistics Service of the U.S. Department of Agriculture in cooperation with the North Carolina Department of Agriculture and Consumer Services. The collection and dissemination of agricultural statistics had its start in 1863. This is one of the oldest activities of the United States Department of Agriculture. It was recognized that there were many advantages of a joint relationship between the State and Federal Governments in the development of agricultural statistics. In 1919, the N.C. Department of Agriculture entered into a cooperative agreement with the U.S. Department of Agriculture to provide detailed agricultural statistics. The agreement resulted in the creation of the Agricultural Statistics Division of the North Carolina Department of Agriculture and Consumer Services. The North Carolina Field Office of USDA's National Agricultural Statistics Service publishes official statistics on crops, livestock, prices, and various other agricultural items. The most important reports and the approximate dates of releases are shown in the table below. The reports marked with an (*) are issued separately and are only available at **www.ncagr.gov/stats**. All others are included in the monthly release entitled "Farm Report." These reports are free and available by writing to: State Statistician, Agricultural Statistics, P.O. Box 27767, Raleigh, NC 27611 or E-mail at: **ncagstat@ncagr.gov**. Current and historical data series can be found at **www.nass.usda.gov**, and using the "Quick Stats" feature.

TYPE OF REPORT	FREQUENCY OF REPORT	APPROX. DATE AVAILABLE
CROP REPORTS		
Annual Crop Production	Annually	Second Week in January
Annual Vegetable Production	Annually	Last Week in January

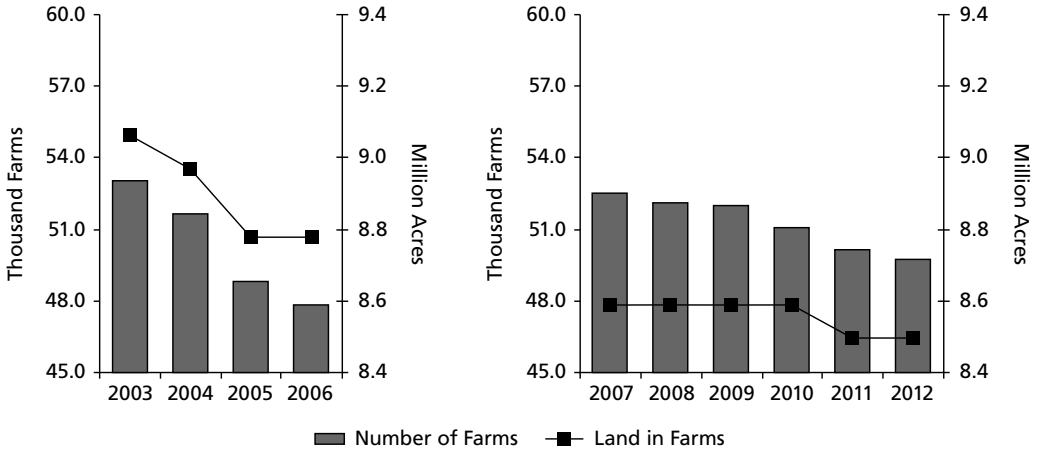
[1] A farm is any establishment from which $1,000 or more of agricultural products were sold or would normally be sold during the year.

NUMBER OF FARMS AND LAND IN FARMS [1]



[1] The 2007 Census of Agriculture established a new farm number base due to methodological changes that allowed a more accurate count of small farms.

2012 WEATHER SUMMARY

The year began with below normal precipitation and above normal temperatures. On January 3rd soil moisture was rated 1% very short, 9% short, 77% adequate and 13% surplus. Throughout the early months temperatures remained higher than normal and by April 24th the NC Drought Advisory Council designated 35 counties as "abnormally dry". Soil moisture concerns were relieved by the widespread showers during the month of May. Farmers were able to progress with the planting of cotton, peanuts, soybeans, tobacco transplanting, the cutting of hay and harvesting of small grains. The warmer temperatures also aided crop condition. June and July brought periods of excessive heat and sporadic rainfall causing a decline in surplus soil moisture. Showers returned in August and September and temperatures hovered around normal. By the end of September statewide soil moisture levels rated 12% short, 78% adequate and 10% surplus. Hurricane Sandy arrived the last weekend of October bringing high winds and several inches of rain to the coast and up to a foot of snow in the mountains. November and early December were dryer than the previous few months and farmers spent their time harvesting cotton and soybeans and planting winter grains. By the end of December statewide soil moisture was rated 1% very short 14% short, 69% adequate, and 16% surplus.

NORTH CAROLINA

DEFINITIONS & METHODOLOGY

Cash receipts for agricultural commodities are defined as the gross income from sales of crops, livestock, and livestock products during a calendar year. The USDA, Economic Research Service (ERS) uses USDA, National Agricultural Statistics Service (NASS) estimates to develop state level cash receipts. The county level cash receipts in this publication are based on the ERS state level cash receipts and various county data. To ensure respondent confidentiality, estimates at any level, including county estimates, are not published if those estimates would disclose any information about individual operations. More information about ERS and NASS data can be found at the following websites:

http://www.ers.usda.gov/data-products/farm-income-and-wealth-statistics
http://www.nass.usda.gov/Data_and_Statistics/

*[1] Cash receipts from farm marketings represent gross returns from the actual sales of crops and livestock products during the calendar year. [2] Totals may not equal sum of counties due to rounding. *Cash receipts are not published for some counties to avoid disclosure of individual farming operations. USDA NASS County Estimating Program Policies and Standards apply.*

Source: Economic Research Service, USDA

[1] Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization or Economic Cooperation and Development.

[2] Includes repair and maintenance of capital items, machine hire and customwork, marketing, storage, and transportation, contract labor and miscellaneous expenses.

US 2012	**101,898**	**178,313**	**897,514**	**78,971**

[1] Excludes commercial broilers. [2] Includes rendered, died, destroyed, composted, or disappeared for any reason except sold during the 12-month period.

HONEY
Production, Stocks and Value

Year	Honey Producing Colonies [1]	Yield per Colony	Production	Stocks December 15 [2]	Average Price per Pound [3]	Value of Production [4]
	Thousands	*Pounds*	*Thousand Pounds*	*Thousand Pounds*	*Dollars*	*Thousand Dollars*
2008	12	52	624	137	2.18	1,360
2009	11	45	495	84	2.57	1,272
2010	13	46	598	144	2.66	1,591
2011	14	62	868	95	2.83	2,456
2012	**13**	**39**	**507**	**106**	**3.69**	**1,871**
US 2012 [5]	**2,624**	**56.1**	**147,092**	**32,922**	**1.95**	**286,976**

[1] Honey producing colonies are the maximum number of colonies from which honey was taken during the year. It is possible to take honey from colonies which did not survive the entire year. [2] Stocks held by producers. [3] Average price per pound based on expanded sales. [4] Value of production is equal to production multiplied by average price per pound. [5] Due to rounding, total colonies multiplied by total yield may not exactly equal production.
