0303 Food & water during transport	Acceptable	0304 Observation of animals	Acceptable

Narrative Explanation, if needed

This is a follow up inspection from 7/11/11.

Items addressed:

.0204 Cat Room - The shelter has painted the particle board walls with a washable, scrubbable paint. All cages except one row are now positioned so that no cats can reach through the cage to the wall. Unless this wall becomes damaged by the cats, the position of these cages will not be an issue. If the wall becomes damaged, the cages will need to be moved. Sealing and painting this room has improved the odor and brightness of this room.

check here if additional pages of narrative are attached check here if a euthanasia inspection form is attached

Narrative Explanation, continued

.0101 Records- Much improvement is noted in the records. Addresses are complete with the city of the impounded animals.

.0101 Records - Much improvement is noted in the description of the impounded animals. The shelter director and the adoptions coordinator have created a laminated color breed chart of dogs and cats to give to each ACO to assist them in correctly identifying the impounded animals on the records.

Comments:

Temperature was 75* at 12:15pm today.

There were 3 transport vehicles on site today. Transportation standards were discussed with the director. There is not any means of adjusting the air flow in the transport units. There are small vents but they are not adjustable.

Remember to have ACO's clean the transport units between shipments.

I was advised by the director that the shelter would be starting to use a new approved disinfectant for controlling canine Parvo and Distemper. The shelter now vaccinates for Distemper and Parvo and their cases have been reduced.

check here if additional pages of narrative are attached

check here if a euthanasia inspection form is attached
