FOREWORD

The 2003 edition of the *North Carolina Pesticide Report* represents a revision of previous issues. By elaborating on the purpose of this report, by adding new material, and by better defining the substances listed, we attempted to reflect in a more meaningful manner, the information collected during the 2003 calendar year. We hope that more readers will be able to use it effectively.

This will acknowledge and express our appreciation to the following people who made significant contributions to the contents and preparation of this Pesticide Report: **Pesticide Section** - Margaret D. Broome, Betty H. Griffin, Eleanor F. Lipscomb, Luella D. Thwreath and Laura L. Stover, *Processing Assistant III's*; Stacey R. Hicks, Amy D. Disbennett and Ann Vaughn, *Office Assistant IV's*; Jamie Frye, *Administrative Secretary II*, Michael V. Williams and Jan L. Culbreth, *Information Processing Technicians*; Florence S. Lamphier, *Administrative Officer I*; James W. Burnette, Jr., *Pesticide Administrator*; Sharron A. Stewart, *Deputy Pesticide Administrator*; L. Lee Davis, *Registration Manager*; Dr. Colleen M. Hudak-Wise, *Certification, Licensing & Outreach Manager*; J. Patrick Jones, *Field Operations & Regulatory Manager*; Dr. Henry F. Wade, *Environmental Quality Manager*; Robert M. Welker, *Quality Assurance Officer*; Kay G. Harris, *Worker Protection Specialist*; Carmina C. Hanson, *Bilingual Pesticide Specialist*; Michael A. Mitchell, *Field Operations Specialist*, William G. Parham, III, and Carolyn M. Thompson, *Pesticide Specialists*; James H. Choate, *Certification Specialist*; John B. Dalley and Dwight E. Seal, *District Managers*; James C. Bristow, Jr., Charles L. Clark, Benny C. Griffin, N. Patrick Farquahar, Gwen T. Minton, W. Howard Minton and James T. Perry, *Pesticide Inspector II's*; Thomas C. Bowman, Jr., W. Kenneth Crabtree, M. Timm Dazey, Jr., W. Barry Dunn, Forrest Sue Egelston Moncada, Steven F. Gatton, J. Michael Jackson, R. Steve Taylor, D. Wayne Tyer and Paul H. Ward, III, *Pesticide Inspector I's*; **Food and Drug Protection Division** - E. Bruce Williams, *Director*; Dr. Joel M Padmore, *State Chemist*; Dr. Royden Saah, *Chief Microbiologist*; Martha Bray and Dawn Davis, *Microbiologists*; Ralph L. Denning, *Supervisor Pesticide Laboratory*; R. Vern Park, Stefanie A. Raysich, Ronnie E. Rollins and Frankie G. Worsham, *Chemists*; Coy T. Bowling, *Processing Assistant*; George Hernandez, *LAN Administrator*.

How to Use This Report

The N.C. Pesticide Board is mandated by the General Statutes of North Carolina (§ 143-437) to make annual reports to the Governor on matters involving pesticides. The *North Carolina Pesticide Report for 2003* fulfills this mandate. Considerable time and effort have gone into editing and organizing this 2003 edition which summarizes regulatory activities performed under the N.C. Pesticide Law of 1971. Every section has been updated, and new information has been added in order to make the *North Carolina Pesticide Report for 2003* a useful reference. In this document you will find the following:

Introduction

The Introduction describes the development of laws and regulations governing the sale and use of pesticides in North Carolina. It also refers to certain divisions in the North Carolina Department of Agriculture & Consumer Services that perform key roles in regulating and controlling the sale and use of pesticides in this State.

North Carolina Pesticide Law of 1971 and Adopted Regulations

This section presents a brief abstract of the North Carolina Pesticide Law of 1971. It also indicates where to obtain a complete copy of the Law and the pursuant Regulations adopted by the North Carolina Pesticide Board.

Pesticide Board and Pesticide Advisory Committee

This section presents a brief description of the duties and composition of the North Carolina Pesticide Board and the North Carolina Pesticide Advisory Committee. In addition, a brief summary of each North Carolina Pesticide Board meeting held during 2003 is given.

Pesticide Environmental Trust Fund

In this section, a summary of the Pesticide Environmental Trust Fund's financial transactions for 2003 is presented. Balances, receipts, expenditures, refunds, cumulative (1993-2003) figures and project summaries are given.

Pesticide Container Recycling and Disposal Assistance Programs

This section summarizes the amount of plastic pesticide containers recycled during 2003 and the amount of pesticides waste collected at both the designated disposal collection sites and permanent household hazardous waste collection sites across North Carolina during the same year.

Licensed Pesticide Dealers, 2003

This section is a directory of the names and counties of pesticide dealers licensed in 2003.

Licensed Pesticide Aerial Applicators, 2003

This section is a directory of the names and counties of aerial pesticide applicators licensed in 2003.

Licensed Pesticide Ground Applicators, 2003

This section is a directory of the names and counties of ground pesticide applicators licensed in 2003.

Licensed Pesticide Public Operators, 2003

This section is a directory of the names and counties of public operators licensed in 2003 to apply pesticides for municipal, county, state, and/or federal governments.

Licensed Pest Control Consultants, 2003

This section is a directory of the names and counties of pest control consultants licensed in 2003.

NOTE. Individually requested and tailored lists of registrants, dealers, applicators or consultants are available by contacting the Pesticide Section at (919) 733-3556. A nominal printing charge may apply.

Definitions Adopted

This section explains definitions that were adopted for reporting the analytical results of pesticides sampled by pesticide inspectors and analyzed by the Department's laboratories.

Table 1

Table 1 gives the analytical results of pesticides sampled and analyzed for their formulations. Company name and address are those listed on the product label when it was purchased in the marketplace.

Table 2

Table 2 presents the results of disinfectants tested for their label guarantee to kill various microorganisms. Here again, company name and address are those listed on the product label when it was purchased in the marketplace.

Table 3

Table 3 is an alphabetical listing of the names and addresses of manufacturers and/or distributors that were found to have unregistered or misbranded products in the marketplace during 2003.

Summary of Regulatory Activities Performed

This section presents a summary of the various regulatory activities performed by the Department under the North Carolina Pesticide Law of 1971. The following information is included: number of manufacturers who registered pesticides for sale; number of pesticide products registered; number of physical samples collected and examined; number of stop-sale, stop-use, or removal orders issued; the number of licenses and private applicator certificates issued; and the number of compliance inspections conducted.

Introduction

The term "Pesticide" covers a large number of materials and mixtures intended for destroying, controlling, or repelling pests such as insects, weeds, and other noxious plants, predatory animals and birds, soil-infesting pests such as nematodes, algae, snails, and bacteria. Other examples are disinfectants, antiseptics, and fungicides for use other than on living man or other animals, defoliants, various repellents, fly paper, and other adhesive products whose action goes beyond simple mechanics, moth proofers, wood preservatives other than common paints, mildew controls, and seed fumigants.

An adequate and readily available supply of many of these products is essential in the economical production of feed and fiber crops. The preservation of many products in storage and the control of domestic and industrial pests which affect both the health and welfare of human beings and animals are like-wise dependent on such materials.

While the development and distribution of various pesticides to serve the needs are important, provisions must be present to protect the public. During the years 1947 through 1971, it was the purpose of the economic poisons law (North Carolina Insecticide, Fungicide, and Rodenticide Act of 1947, G.S. 4A, Chapter 106) to protect the public from adulterated, misbranded, worthless, and dangerous products, and legitimate manufacturers from unscrupulous competition.

During the years 1953 through 1971, the aerial application of pesticides was regulated by the North Carolina Aerial Crop Dusting Law, G.S. 4B, Chapter 106. The Law and the regulations promulgated thereunder, in summary, required the registration and licensing of contractors and aviators who engaged in the custom application of pesticides by aircraft in North Carolina. The validity of a license was further restricted to the period of time that coverage by liability bond or insurance for damage by aircraft was in force.

During 1969, the North Carolina General Assembly through House Resolution 1392 directed the Legislative Research Commission to study the laws regulating pesticides in N.C. and report its findings and recommendations to the 1971 General Assembly. As a result of the findings and recommendations of the Commission, the North Carolina Pesticide Law of 1971 was adopted. The N.C. Pesticide Law of 1971 established the North Carolina Pesticide Board as the governing body for the programs of pesticide management and control set forth in the Law. Provisions for regulating the use, application (aerial and ground), sale, storage, disposal and registration of pesticides are set forth in the Law.

The Law provides for the adoption of a list of restricted use pesticides and requires the licensing of all pesticide dealers who sell restricted use pesticides directly to users. Pesticide applicators and consultants are also subject to licensing requirements. Private pesticide applicators may be required to be certified or recertified in order to purchase, use, and supervise use of restricted use pesticides in agricultural commodity production.

The Commissioner of Agriculture is responsible for administering and enforcing the Law and all rules and regulations adopted by the Board.

Each brand or grade of pesticide must be registered with the North Carolina Department of Agriculture & Consumer Services before it can be legally offered for sale in the State. A \$30.00 registration fee for each brand or grade must accompany each application for registration. In addition to the registration fee, an annual environmental assessment must be paid for each brand or grade to be registered in North Carolina. The assessment shall be \$50.00 if the applicant's gross sales of the pesticide in this state for the preceding 12 months for the period ending September 30th were more than \$5,000.00 and \$25.00 if gross sales were less than \$5,000.00. This assessment must accompany the \$30.00 registration fee in order for the registration to be complete.

A statewide inspection service will be maintained to investigate incidents involving pesticide misuse and to implement programs to enhance compliance to the Law and regulations. In addition to product registration and applicator licensing programs, the Pesticide Section of the Food and Drug Protection Division will implement programs as authorized by regulation pertaining to the quality of formulated pesticides, the storage, disposal, and use of pesticides. The Department will maintain analytical laboratories to conduct analysis of official samples obtained for regulatory purposes.

Brief of the North Carolina Pesticide Law of 1971

North Carolina Pesticide Board

Governing Body

Commissioner of Agriculture

Administrative and Enforcement

North Carolina Pesticide Advisory Committee

Assists the Board and Commissioner in an advisory capacity

Any pesticide may be designated as a "Restricted Use Pesticide" upon the grounds that in the judgment of the Board it is so hazardous or injurious to persons, pollinating insects, animals, crops, wildlife, lands, or the environment that additional restrictions on its sale, purpose, use, or possession are required. Restricted Use Pesticides also include any pesticide required by the Environmental Protection Agency to bear the designation on its labeling "Restricted Use Pesticide." (Restricted Use Pesticides have been established by regulation.)

Restricted Use Pesticides

The Board may require certification and recertification of private pesticide applicators and charge a fee of up to \$10.00. The current fee is established by regulation at \$6 for a three-year certification.

Private Applicator Certification Requirement

All pesticide dealers who sell restricted use pesticides must be licensed. Application for a pesticide dealer's license must be accompanied by a nonrefundable fee of \$30. All licenses shall expire on December 31 of the year for which they are issued. The license may be renewed annually upon application to the Department of Agriculture and Consumer Services, accompanied by a non-refundable fee of \$30 for each license. Each applicant must demonstrate upon written, or written and oral, examination his knowledge of pesticides, their usefulness and their hazards; his competence as a pesticide dealer; and his knowledge of the laws and regulations governing the use and sale of pesticides.

Pesticide Dealer Licensing Requirement

No person shall engage in the business of pesticide applicator within North Carolina unless he is licensed annually by the Board. Each license application shall be accompanied by a nonrefundable fee of \$30 for each applicator's license and an additional \$10 for each aircraft to be licensed. A pesticide applicator is defined as any person who owns or operates a pesticide application business or who provides, for compensation, a service that includes the application of pesticides upon the lands or properties of another; any public operator; any golf course operator; any seed treater; any person engaged in demonstration or research pest control; and any other person who applies pesticides for compensation and is not exempt from this definition. It does not include:

Pesticide Applicator Licensing Requirement

a. Any person who uses or supervises the use of a pesticide (i) only for the purpose of producing an agricultural commodity on property owned or rented by him or his employer, or (ii) only (if applied without compensation other than trading of personal services between producers of agricultural commodities) on the property of another person, or (iii) only for the purposes set forth in (i) and (ii) above.

b. Any person who applies pesticides for structural pest control, as defined in the North Carolina Structural Pest Control Law (G.S. Chapter 106, Article 4C.)

Each applicant must demonstrate upon written, or written and oral, examination his competence as a pesticide applicator or public operator. In addition, to be licensed as a pilot, a person must have 125 hours and one year's flying experience as a pilot in the field of aerial pesticide application.

No person shall perform services as a pest control consultant without first procuring from the Board a license. The application for a license shall be accompanied by an annual nonrefundable fee of \$30. A pest control consultant is defined as any person who, for a fee, offers or supplies technical advice, supervision, or aid, or recommends the use of specific pesticides for the purpose of controlling insects, plant diseases, weeds, and other pests, but does not include any person regulated by the North Carolina Structural Pest Control Act. Each applicant must demonstrate upon written, or written and oral, examination his competence as a pesticide consultant. An applicant for a pest control consultant license must possess a Ph.D., master's, or bachelor's degree in an agricultural or biological science from an accredited college or university with a minimum of 30 semester hours or 45 quarter hours of credit in subject areas pertinent to the category in which the applicant seeks to obtain a license. Emphasis of study must include insect, plant, bacterial, and fungal pests, as applicable to the category, and integrated pest management.

Pest Control Consultant Licensing Requirement

No person shall handle, transport, store, display, or distribute pesticides in such a manner as to endanger man or his environment.

Handling, Storage, and Disposal of Pesticides

Every pesticide prior to being distributed, sold, or offered for sale within this State or delivered for transportation or transported in intrastate commerce or between points within this State through any point outside this State, shall be registered and such registration shall be renewed annually. Each manufacturer, distributor, or registrant of a pesticide shall supervise the activities of any employee or agent to prevent the making of deceptive or misleading statements about a pesticide. It shall be unlawful for any person to distribute, sell, or offer for sale any restricted use pesticide to any dealer who does not hold a valid N.C. Pesticide Dealer License.

Registration

A registration fee of \$30 for each brand or grade of pesticide is required. An additional \$200 delinquent registration penalty shall be assessed against the registrant for each brand or grade of pesticide marketed in North Carolina prior to registration.

Registration Fee and Delinquent Penalty

An annual Pesticide Environmental Trust Fund assessment fee is required for each brand or grade of pesticide registered. This fee is either \$25.00 or \$50.00, based on gross sales of the pesticide within the State for the previous year. The assessments provide funding for agromedicine efforts at East Carolina University, North Carolina State University, and North Carolina A&T University and for pesticide environmental programs administered by the N.C. Department of Agriculture & Consumer Services.

Pesticide Environmental Trust Fund Assessment

Registration is subject to refusal or cancellation for cause and upon hearing.

Refusal or Cancellation of Registration

Any brand or grade found to be deficient or excessive in active ingredients, misbranded, adulterated, or not registered is subject to "Stop Sale, Stop Use or Removal Orders."

"Stop Sale, Stop Use or Removal Orders"

The Pesticide Board may assess a civil penalty of not more than \$2,000 against any person who violates or directly causes a violation of any provision of this Article or any rule adopted pursuant to this Article. In determining the amount of any penalty, the Board may consider the degree and extent of harm caused by the violation and the cost of rectifying the damage caused by the violation.

Civil Penalties

Notwithstanding any other provision of this Law, the maximum penalty which may be assessed under this section against a "private pesticide applicator" is \$500 and such penalties may be assessed only for willful violations.

Other Penalties

Any person who shall be adjudged to have violated any provision of the Law, or any regulation of the Board adopted pursuant to this Law, shall be guilty of a Class 2 misdemeanor and for each violation shall be liable for a penalty of not less than \$100 or more than \$1,000 or shall be imprisoned for not more than 60 days, or both. In addition, if any person continues to violate or further violates any provision of this Article after written notice from the Board, the court may determine that each day during which the violation continued or is repeated constitutes a separate violation subject to the foregoing penalties.

NOTE: Copies of the North Carolina Pesticide Law of 1971, as amended through 1998, may be obtained upon request to the Pesticide Section, North Carolina Department of Agriculture & Consumer Services, 1090 Mail Service Center, Raleigh, NC 27699-1090. Copies of the Regulations adopted by the North Carolina Pesticide Board may be requested from the same source. Both documents are also available on the Internet at www.ncagr.com/fooddrug/pesticid

North Carolina Pesticide Board

The North Carolina Pesticide Board is a seven-member, governor appointed Board charged with the duty of governing pesticide management and control as set forth in the North Carolina Pesticide Law of 1971. The members represent different sectors of the regulated public.

The Board adopts rules and regulations and makes policies for the program outlined in the North Carolina Pesticide Law of 1971. Board members serve staggered four-year terms. Appointments to fill vacancies in the Board are of individuals having the same credentials as the predecessor.

MEMBERS OF THE NORTH CAROLINA PESTICIDE BOARD, 2003

(N.C. General Statute §143-436)

One member each representing the North Carolina Department of Agriculture and Consumer Services; the North Carolina Department of Environment and Natural Resources; and the State Health Director or his designee. The persons so selected may be either members of a policy board or departmental officials or employees.

Dr. Robert E. Cook, Raleigh, NC
Representing the N.C. Department of Environment and Natural Resources

Mr. Carl E. Falco, Raleigh, NC
Representing the N.C. Department of Agriculture and Consumer Services

Dr. Ricky L. Langley, Raleigh, NC
Representing the State Health Director

A representative of the agricultural chemical industry.
Dr. Robert Earl Ogle, Raleigh, NC

A person directly engaged in agricultural production.
***Mr. M. Scott Whitford**, Grantsboro, NC

Two at-large members, from other fields of endeavor, one of whom shall be a nongovernmental conservationist.
****Mr. Charles L. Keels**, Cary, NC

Dr. W. Benson Kirkman, Raleigh, NC (nongovernmental conservationist)

* Chairman

** Vice Chairman

Secretary, James W. Burnette, Jr.

North Carolina Pesticide Board Meetings

February 11, 2003

Assistant Attorney General Tom Meacham presented settlement agreements for the Board's consideration.

The Board received a request from Universal Forest Products, Inc., Grand Rapids, MI for exemption of an existing well for their facility in Elizabeth City, NC. Comments were expressed by the Board members regarding construction requirements. The Board took no action on the request, but instead, asked Staff to contact the Company once again to request additional information concerning the existing well.

Dr. Mike Linker, NCSU, presented a final report on the Pesticide Environmental Trust Fund project "IPM Program in School Buildings."

Dr. Dennis Osborne discussed a training program to the Board titled "Good Agricultural Practices (GAP), Produce Safety Training Program". Dr. Osborne advised the Board that this is a model program, and represents an unparalleled level of cooperation between two state agencies: NCSU and the NCDA&CS. He explained that prevention of microbiological contamination of the food supply is what GAP is designed to address.

April 8, 2003

Mr. Jim Seufert, Regulatory Specialist for Universal Forest Products, Inc. spoke to the Board. Mr. Seufert provided additional information to the Board on the request from Universal Forest Products, Inc. Grand Rapids, MI for the exemption of an existing well from 2NCAC9L Section .1905(e) Storage Facility Requirements: RUP, for their facility in Elizabeth City, NC. The Board agreed to table the issue until a formal decision by the Department of Environment and Natural Resources regarding the "isolation requirements" had been made.

Assistant Attorney General Tom Meacham presented settlement agreements for the Board's consideration and approval.

May 13, 2003

Dr. Colleen Hudak presented the PETF Report for 2002. The work plan for 2003 and an estimate of available funds for 2003 were also presented.

Dr. Greg Cope presented the final report on the PETF project Pesticides and Human Health Crop-Specific Bilingual Educational Materials for Workers and Producers of Tomatoes and Grapes.

Dr. Henry Wade presented the 2002 PETF Plastic Pesticide Container Recycling Program summary activities.

Dr. Wade presented the John L. Smith Pesticide Container recycling Award for 2002 to Beaufort County. Mr. Rod Gurganus, Pesticide Coordinator for Beaufort County Cooperative extension Service accepted the award.

Dr. Dave Monk, NCSU Extension Specialist, requested the Board's consideration of a FIFRA Section 18 Emergency Exemption for the use of Dual Magnum Herbicide in sweet potatoes to control pigweed.

Assistant Attorney General Tom Meacham presented settlement agreements for the Board's consideration and approval.

June 10, 2003

Julia Storm, NCSU Agromedicine Information Specialist, presented a PETF project update on Health Care Provider Training, Pesticide Related Illness and Healthcare Issues.

The Board considered a PETF funding proposal for Como Controloar Plagas (How to Control Pests): A Cartoon-Novela, by Dr. Thomas A. Arcury, Wake Forest University School of Family Medicine.

Derrick Bell and Royce Batts, NCDA&CS Food and Drug Protection Division, Pesticide Disposal Assistance Program, presented a PETF proposal entitled Pilot Program to Integrate Pesticide Container Recycling and Pesticide Disposal in North Carolina.

Dr. Mike Stranghellini, NCSU Department of Entomology asked for the Board's support of a FIFRA Section 18 Emergency Exemption for the use of Api Life Var in beehives to control varroa mites.

Assistant Attorney General Tom Meacham presented the settlement agreements to the Board for consideration and approval.

August 12, 2003

Dr. Greg Cope, NCSU Toxicologist presented a PETF funding proposal, Assessing Hazards of Pesticides to Native Freshwater Mussels for consideration by the Board.

Dr. Damian Shea, NCSU Toxicologist, presented a PETF funding proposal Predicting Environmental Exposure to Pesticides in Surface Waters of North Carolina, for consideration by the Board.

Assistant Attorney General Tom Meacham presented the settlement agreements to the Board for consideration and approval.

September 9, 2003

The Board heard a PETF funding proposal presentation from Dr. Mike Linker entitled An Education and Incentive-Based Program to Stimulate Adoption of Integrated Pest Management (IPM) Programs in North Carolina Public Schools.

Ms. Katherine McGinnis, Eastern Area AHEC and Alan Branigan, ECU School of Medicine presented PETF funding proposal for the project, On-line Training for Health Care Providers on Pesticide Related Illness and Health Issues. Because many of the targeted audiences are located in rural areas, expansion to the Internet will greatly enhance continuing education for healthcare providers. Continuing Education credits will be awarded for course completion. Training healthcare providers about pesticide related illness is a national worker safety initiative.

A final report of the PETF project Designing an Inexpensive Pesticide Storage, Mixing and Loading facility for Small Farmers was presented by Jerry Moody, Avery County Extension Service.

The Board considered an updated Memorandum of Agreement between the North Carolina Pesticide Board and Plant Protection and Quarantine (PPQ), Animal and Plant Health Inspection Service (APHIS), U.S. Department of Agriculture (USDA) to allow federal employees to apply any pesticide in North Carolina by replacing their applicator's certification for a pesticide applicator's license.

Assistant Attorney General Tom Meacham presented the settlement agreements to the Board for consideration and approval.

November 12, 2003

The Board discussed the impact of the 2003 Amendments to the Administrative Procedure Act on the Aerial Rules Proposals. The general Assembly amended the Administrative Procedure Act (APA) concerning the adoption of rules, from a thirty-day comment period to a sixty-day comment period effective July 1, 2003 And in doing so, stated that any rule, which was not adopted in the final form effective October 1, 2003, would have to comply with the amended APA. Therefore, in order for the Board to continue with the proposed aerial rules changes, the public input process would have to start over to provide for increased public input.

The Board voted to retain the current rules on aerial pesticide application.

Assistant Attorney General Thomas Meacham presented settlement agreements to the Board for consideration and approval.

The North Carolina Pesticide Advisory Committee

The North Carolina Pesticide Law of 1971 establishes a twenty-member Pesticide Advisory Committee to advise the N.C. Pesticide Board on technical questions and on the development of rules and regulations. Members of the Advisory Committee represent different sectors of the regulated public. Members of the Committee serve at the pleasure of the Board.

MEMBERS OF THE N.C. PESTICIDE ADVISORY COMMITTEE, 2003

(N.C. General Statute §143-439)

Three practicing farmers

****Mr. Dan McConnell**, Hendersonville, NC

****Mr. Marshall W. Grant**, Garysburg, NC

****Mr. Darryl K. Corriher**, China Grove, NC

One conservationist (at large)

****Mr. John Paul Lilly**, Plymouth, NC

One ecologist (at large)

****Dr. Thomas R. Wentworth**, Department of Botany, N.C. State University, Raleigh, NC

One representative of the pesticide industry

****Mr. Rolf Jesinger**, Apex, NC

One representative of agri-business (at large)

****Mr. Charles G. Rock**, Greensboro, NC

One local health director

****Ms. Jenny P. Lassiter**, Pamlico County Health Department, Bayboro, NC

Three members of the North Carolina State University (NCSU) College of Agriculture & Life Sciences, at least one of which shall be from the area of wildlife or biology

***Dr. Clyde E. Sorenson**, Associate Professor, Dept. of Entomology, N.C. State University, Raleigh, NC

***Dr. P. Sterling Southern**, Department of Entomology, N.C. State University, Raleigh, NC

***Dr. Alan C. York**, Department of Crop Science, N.C. State University, Raleigh, NC

One member representing the North Carolina Department of Agriculture & Consumer Services (NCDA&CS); and one member representing the North Carolina Department of Environment & Natural Resources (NCDE&NR); the State Health Director or his designee

***Mr. James W. Burnette, Jr.**, N.C. Department of Agriculture & Consumer Services, Raleigh, NC

***Mr. Arthur Mouberry**, N.C. Department of Environment & Natural Resources, Raleigh, NC

***Mr. Ronald J. Howell**, N.C. Department of Health & Human Services, Raleigh, NC

One representative of a public utility or railroad company which uses pesticides

****Mr. Joseph A. Gregory**, Progress Energy Company, Raleigh, NC

One representative of the Board of Transportation

***Mr. Don Lee**, N.C. Department of Transportation, Raleigh, NC

One member of the North Carolina Agricultural Aviation Association

****Mr. M. Boyd Respass**, Dreamstreet Aviation, Inc., Washington, NC

One member of the general public (at large)

****Ms. Wanda P. Winslow**, Asheville, NC

One member actively engaged in forest pest management

****Mr. Coleman A. Doggett**, Cary, NC

One member representing the Division of Waste Management of the North Carolina Department of Environment and Natural Resources

***Mr. William R. "Bill" Hocutt**, N.C. Department of Environment & Natural Resources, Raleigh, NC

*Agency appointments

**Appointed by Board

Chairman, Dr. Alan C. York

Vice-Chairman, Marshall W. Grant

Secretary, James W. Burnette, Jr.

PESTICIDE ENVIRONMENTAL TRUST FUND

Throughout 2003, the North Carolina Department of Agriculture & Consumer Services (NCDA&CS) continued to fulfill the mandate of N.C. General Statutes §143-442 and §143-468 which specify the collection and disposition of environmental assessment fees that pesticide manufacturers and distributors pay when they register pesticide products for sale in North Carolina.

RECEIPTS for 2003

NCDA&CS collected \$406,860.00 in environmental assessment fees from the registration of approximately 12,372 pesticide brands during 2003. Fifty-four percent of the receipts were for products with reported annual North Carolina gross sales of less than \$5,000, and forty-six percent of the receipts were for products with annual sales of \$5,000 or more. (The annual environmental assessment/product is \$25 or \$50 per brand, respectively.)

BALANCES for 2003

Initial receipts from pesticide registrants paying PETF assessments are deposited into the NCDA&CS Pesticide Environment Assessment Fund (PEAF, Account No. 6136). Transfers are made from Account No. 6136 according to North Carolina G.S. § 143-468(b) as follows: 25% to agromedicine and 75% to the Pesticide Environmental Trust Fund (PETF, Account No. 6137), the account which is used by NCDA&CS to sponsor the various pesticide environmental programs summarized in this report.

As of December 31, 2003, there was a balance of \$163,818.35 in Account No. 6136 and a balance of \$243,601.22 in Account No. 6137. The total amount in both accounts as of December 31, 2003 was \$407,419.57.

EXPENDITURES FOR 2003

During 2003, NCDA&CS expended a total of \$449,415.87 from Account Nos. 6136 and 6137.

As specified in North Carolina G.S. § 143-468(b), PETF funds were distributed to North Carolina State University (NCSU), NC A&T State University and East Carolina University for operational expenses associated with administering and implementing a statewide agromedicine program; each university received 2.5% of the total PETF receipts collected during the calendar year. Twenty-percent of the total PETF receipts was used to support the agromedicine information specialist position in NCSU's Environmental & Molecular Toxicology Department. The aggregate amount of PETF funds spent on agromedicine during 2003 was \$111,434.14.

The remaining \$337,981.73 was spent on pesticide container recycling and six environmental projects:

- Three counties (Carteret, Halifax and Nash) received a total of \$40,750.00 from the PETF to support local recycling of plastic pesticide containers during 2003. In addition, \$2,836.63 was spent on promotional materials for the state's pesticide container recycling program. The total amount spent on the state's pesticide container recycling program for 2003 was \$45,645.21.
- \$10,984.00 for Using AFOP Trainers in Primary Health Care Facilities – Elizabeth Freeman Lambar, NC Dept. of Health & Human Services Rural Health Development
- \$30,993.00 for How to Control Pests: A Cartoon Novella – Dr. Thomas Acury, Wake Forest University School of Medicine
- \$60,814.33 for School IPM – Dr. H.M. Linker, NC State University
- \$61,033.00 for Predicting Exposure to Pesticides in Surface Waters – Dr. Damian Shea, NC State University
- \$68,318.50.00 for Assessing Hazards of Pesticides to freshwater Mussels – Dr. Damian Shea, NC State University
- \$48,800.00 for On-Line training for Health Care Providers, Katherine McGinnis, Eastern Area Health Education Center
- \$11,393.69 for Pilot Program to Integrate Recycling & Disposal, Derrick Bell, NC Dept. of Agriculture and Consumer Services

REFUNDS FOR 2003

Refunds in the totaling \$17,685.02 were received during 2003 as follows:

- \$13,685.02 – from NC State University (School IPM)
- \$4,000.00 – from East Carolina University (Trining Health Care Providers)

Dr. Gary Roberson, NC State University

CUMULATIVE PETF FIGURES (1993-2003)

As of December 31, 2003, a total of \$4,013,285.00 in receipts has been collected since the inception of the PETF.

Since 1993, PETF has provided a total of \$1,006,961.20 for support of agromedicine in North Carolina.

Expenditures for pesticide environmental programs between 1995 and 2003 have totaled \$2,745,399.40.

Pesticide Environmental Trust Fund (PETF) Project Summaries

Agromedicine Institute: Partners for Health & Safety in Agriculture, Forestry and Fisheries

Research, education, and prevention/intervention projects are implemented to improve the health and safety of rural communities involved in these three industries. The North Carolina Agromedicine Institute (NCAI) is a collaborative effort involving East Carolina University, North Carolina State University, and North Carolina A & T State University. The North Carolina Cooperative Extension Service (NCCES) and the Eastern Area Health Education Center are outreach partners of the Institute.

The Southern Coastal Agromedicine Center (SCAC), which is one of nine regional centers funded through the National Institute for Occupational Safety and Health, is also housed at the NCAI. The SCAC covers Puerto Rico, Virginia, North Carolina, South Carolina, Georgia, Alabama, Mississippi, and Florida.

The NCAI has a web site, www.ncagromedicine.org that describes projects and programs that are currently underway.

IPM for School Buildings

Initially funded in 1998, this project ended October 31, 2002. The final project report was presented to the North Carolina Pesticide Board by Dr. Mike Linker on February 11, 2003. According to the project results, lack of knowledge of Integrated Pest Management (IPM) practices and lack of resources to compare the costs and effectiveness of conventional and IPM services are probably factors in the continued use of conventional pest control services by schools.

In September 2003, Dr. Linker was awarded a second PETF grant for School IPM. He will use the new funding to conduct a program in North Carolina to increase adoption of integrated pest management (IPM) in public schools. Dr. Linker plans to conduct a comprehensive education program to foster administrative and institutional support for IPM programs. The project will also provide incentives to schools that are willing to adopt IPM. The following are specific project objectives:

- (1) To raise awareness of IPM and garner administrative and institutional support for IPM programs within school systems.
- (2) To conduct a comprehensive education and outreach program targeting various sub-groups of the school community and other non-school groups to influence the practice of IPM in schools, and to delineate their specific roles and responsibilities and emphasize the need for community effort in a school IPM program.
- (3) To set up IPM demonstration sites.
- (4) To develop and provide incentives that will stimulate acceptance and adoption of IPM programs in North Carolina schools.
- (5) To develop an IPM Start-up Kit (on CD or Pamphlet, booklet etc.) with step-by-step instructions and information on how to implement an IPM program.

As part of the new awareness campaign, a presentation was made on Sept. 25, 2003 at the Annual Convention of N.C. Public School Maintenance Directors. Dr. Linker is currently drafting a Memorandum of Understanding to circulate among several entities. He is also formulating a model IPM policy to be adopted by schools and preparing educational materials. Schools are now being selected for use as demonstration sites.

A Demonstration Project Using AmeriCorps WPS Trainers at Primary Health Care Facilities

PETF funds have been used to recruit and partially support Association of Farmworker Opportunity Programs (AFOP)/AmeriCorps volunteers to train Spanish-speaking farmworkers at different migrant health care clinics across North Carolina. These volunteers are part of a large national effort known as the S.A.F.E. Program (Serving America's Farmworkers Everywhere). Some of the North Carolina volunteers make a 6-month commitment to the project; others enlist for a 11-month period. The North Carolina project has held several training events for the AFOP/AmeriCorps volunteers. Individuals were also given the opportunity to take the N.C. WPS Designated Trainer Exam during their training.

AmeriCorps began enrolling members on March 17th for the 2003 field season. Two volunteers continued as 11-month AmeriCorps members at Columbus County Community Health Center for another year. Greene County Health Care recruited two new 11-month members. Wake County Human Services and Blue Ridge Health Services successfully recruited two 6-month members. Robeson Health Care Corp and Jackson County Health Department recruited three 6-month members, but were unable to retain them. All AFOP volunteers have become North Carolina WPS designated trainers.

The following summarizes the activities of AFOP volunteers through October 1, 2003:

Service Hours: 6,571.5
Pesticide Safety Trainings: 2,285
Health Trainings: 3,767
Training to non-farmworkers: 59
Partnerships: 228
Services: 2,584
Referrals: 1,359
Volunteers Recruited: 31

Crop-specific Bilingual Educational Materials for Workers and Producers of Tomatoes

Funding for this project was approved by the North Carolina Pesticide Board on March 18, 2002. Dr. Greg Cope, a N.C. State University toxicologist, is the project leader. The specific objectives of this project are to (1) produce two educational publications in English and Spanish for the hand-labor intensive crops of grapes and tomatoes, targeting producers and Spanish-speaking agricultural workers in North Carolina, (2) produce an adhesive sign in Spanish and English with the general message “wash your hands to protect yourself and the food supply” for field-side Port-O-Lets®, targeting the agricultural workers in North Carolina.

Work began immediately after funding on the design and production on the “Wash your Hands” adhesive sign (Objective 2). All aspects of this work were completed during July 2002 and 26,000 copies of the adhesive sign were produced and delivered in early August 2002. Distribution of the signs began immediately thereafter. To date, over 25,000 of these signs have been distributed and are being used throughout the state. These sign are being extremely well received and a reprint may be necessary in the near future.

Work on the tomato and grape bilingual publications (Objective 1) began during September 2002 by compiling the necessary pesticide health and safety information on the main pesticides used on each crop and preparing the cover and inside art work for both publications. The final published products were delivered in early April 2003 and distribution to collaborators and clients began in late April 2003. To date, 11,560 of these four publications have already been distributed and are being used throughout the state by the personnel from the NC Department of Agriculture & Consumer Services, NC Department of Labor, NC Cooperative Extension Service, NC A&T State University, NC Farm Bureau, and other entities.

Assessing Hazards of Pesticides to Native Freshwater Mussels

On August 12, 2003, the North Carolina Pesticide Board awarded a PETF grant to Dr. Greg Cope of N.C. State University to generate toxicological information on the acute hazards of pesticides to various life stages of native freshwater mussels. The successful completion of this project will provide resource managers and other decision makers in North Carolina with valuable information that can be used to perform risk assessments for many of the pesticides currently used in the state. This project is just getting underway. It is expected to be completed in August 2006.

Predicting Environmental Exposure to Pesticides in Surface Waters of North Carolina

On August 12, 2003, the North Carolina Pesticide Board awarded a PETF grant to Damian Shea, Chairman of N.C. State’s Department of Environmental and Molecular Toxicology. The goal of this project is to validate the use of surface water quality models to predict exposure to pesticides in North Carolina surface waters. Successful completion of this project should provide North Carolina with the tools to perform ecological risk assessments of commonly used pesticides. This project is expected to conclude in August 2005.

Designing an Inexpensive Pesticide Storage, Mixing, and Loading Facility for Small Farmers

The goal of this PETF-funded project was to demonstrate to the small farmers of the area (Avery, Watuaga, Mitchell, Yancey, Caldwell, and Burke Counties) how a proper storage facility for pesticides can be inexpensively built (approximately \$1,200) using readily available materials. Jerry Moody of the Avery County Cooperative Extension Service was the project leader. The Avery County Cooperative Extension Office is maintaining the building and hosting training events in it. It will also serve as a centrally located facility to house unwanted pesticides between collection days

The entire construction process was documented with extensive photography. Details regarding the construction of the storage facility are described in a brochure that is to be distributed to local farmers. Mr. Moody gave his final project report to the Pesticide Board in September 2003.

Precision Application of Reduced Volumes of Agrochemicals

In April 2002, the N.C. Pesticide Board awarded a PETF grant to Dr. Ray Long of N.C. State University in support of his field research. The ultimate goal of this study is to use digital camera technology coupled with a mechanical topper on a high clearance sprayer to create precision application of sucker control agents to the center of decapitated tobacco stalks. Most of the 2002 field season was spent in developing a lighting system (comprised of a shield, lights, and filters) that produces digital images having excellent contrast between cut stalks and leaves even under varying ambient light conditions. The next step undertaken was to use the software of a machine vision camera to identify the cut stalk

automatically and output an electronic signal that will trigger a spray solenoid for application of the sucker control agent. Unfortunately, the first camera that the project purchased in 2003 did not have sufficient computing speed to process this information before the next stalk entered the visual field. A new camera, however, will soon be available which will be able to process the data much faster, even at ground speeds in excess of 5 MPH. Field tests are being planned for the summer of 2004.

Precise placement of agrochemicals should result in reduced chemical needs, reduced worker exposure, and reduced potential for chemical release into the environment. It is hoped that the once the application system is refined it can be adapted for applying insecticides to small plants of various species.

Training Health Care Providers in N.C. on Pesticide Related Illness and Health Issues

In May 2002, the N.C. Pesticide Board funded this two-year project directed by the N.C. Agromedicine Institute. The goal of the project is to develop and conduct a one-day pilot training for North Carolina health care providers on the recognition, prevention, and treatment of pesticide related illness and health issues. In June 2002, the planning committee met to discuss the results of a needs assessment, Continuing Medical Education (CME) credit approval requirements, and program location, date, and content. The decision was made to hold the conference at the Monroe AHEC Conference Center in Greenville. Approximately 30 health care individuals were trained on November 22, 2002. Most participants were health care providers who work with migrant farm workers. The following agenda topics covered: Diagnosing and Treating Acute Pesticide Exposure; Diagnosing and Treating Chronic Pesticide Exposure Among Rural Populations; Differential Diagnosis of Occupational Health Problems in Farmworkers; Skin Problems in Farmers; and Preparing Your Clinic and Providers to Serve Agricultural Populations. In spring 2003, the planning committee evaluated the results of the training and recommended that on-line training be developed based on this conference.

On-line Training for Health Care Providers on Pesticide Related Illness and Health Issues

On September 9, 2003, the N.C. Pesticide Board approved funding for development of on-line training for health care providers on the topic of pesticide related illnesses. Katherine McGinnis of the Eastern Area Health Education Center is directing the project. Thus far, an instructional designer has been hired to prepare content for the on-line presentation and potential content experts have been contacted. On Oct. 27, 2003, the Advisory Committee will meet to finalize the content outline and to choose the content experts to oversee the project. The course is expected to be on-line in May 2004. It will be posted on the Internet for a minimum of two years. Participants will be able to earn Continuing Medical Education (CME) credits.

Field Testing of a Lethal Oviposition Trap Against Suburban Populations of Aedes Albopictus

Dr. Charles Apperson of N.C. State University received a one-year PETF grant in May 2002 to evaluate the effectiveness of the lethal oviposition (LO) trap to control the Asian tiger mosquito. A field project was set up in eight neighborhoods in Raleigh and Cary, North Carolina, between May and October 2003. Two neighborhoods had LO traps alone, two neighborhoods had LO traps in combination with source (standing water) reduction, two neighborhoods had only source reduction, and two neighborhoods served as controls, with no control methods being used. Mosquito egg laying activity was tracked, and adult mosquitoes were collected. Once a month, backyard surveys were conducted in all neighborhoods. In this survey, all water-holding containers were examined for mosquitoes and samples collected for counting and species identification. Field activities will end October 2003. The project is scheduled to be completed by December 31, 2003.

How to Control Pests: A Cartoon Novella

In June 2003, the North Carolina Pesticide Board awarded a PETF grant to Dr. Tom Arcury of Wake Forest University to produce a cartoon novella about residential pesticide safety and integrated pest management. The novella will be produced both in Spanish and in English. Draft copies have been developed and are currently undergoing review. The project is scheduled to end June 20, 2004.

A Pilot Program to Integrate Pesticide Container Recycling and Pesticide Disposal

The North Carolina Department of Agriculture and Consumer Services has two very important programs that foster pesticide environmental stewardship in North Carolina. The Pesticide Disposal Assistance Program (PDAP) is a non-regulatory program that assists farmers and homeowners with proper, legal disposal of unwanted or unusable pesticides. To date, PDAP has properly disposed of over one million pounds of pesticides from collection events conducted throughout North Carolina. It is funded by appropriations from the NC General Assembly through the NCDA&CS. The Pesticide Container Recycling Program (PCRP) assists counties and local councils in establishing empty pesticide container recycling centers throughout the state. The PCRP is funded by the PETF. Since 1995, more than \$758,000 has been used to promote recycling of plastic pesticide containers in North Carolina.

Two situations in the agricultural community have been targeted that could be addressed through cooperation between the Pesticide Disposal Assistance Program and the Pesticide Container Recycling Program.

1. Improved efficiency could be obtained for the PCRP and the PDAP if a few storage facilities could be strategically located across the state. These storage facilities would serve dual purposes; participating county CES agents would be able to store both empty pesticide containers and unwanted pesticide materials. The project has purchased 3 metal cargo units for three counties (1 per county).
2. Farmers and dealers in North Carolina have many old, brittle, mini-bulk tanks that need to be removed from the farms and dealerships for recycling. This pilot project is conducting 6 mini-bulk recycling events with a pesticide Disposal Contractor on-site to properly handle the generated waste from each event.

Plastic Pesticide Container Recycling Program

In 2003, \$40,750.00 in Pesticide Environmental Trust Fund (PETF) money was awarded to three counties (Carteret, Halifax and Nash counties) to support local recycling of plastic containers. New programs were established in Carteret and Nash. USAg Recycling, Inc., which is the Agricultural Container Recycling Council (ACRC) approved recycler in North Carolina, reported that more than 302,532 pounds of plastic pesticide containers were recycled for the calendar year (2003), making North Carolina one of the leading states in pesticide container recycling. North Carolina ranked 4th in pounds of containers recycled in the 17 state region serviced by U.S. Ag. Seventy-eight counties have recycling programs.

During the fall of 2003, Pesticide Inspector II's visited recycling sites across the state to check on the cleanliness of pesticide containers being stored for recycling and to verify how previously awarded PETF grant money had been spent. Annual county reports were requested from all participating counties in December 2003. A financial audit of all county-awarded PETF recycling grants was also performed.

During 2003, the Pesticide Section distributed a variety of items (pens, hats, rulers, golf tees, and 2-quart calibration cups) to promote the state's recycling of plastic pesticide containers. These items were also shared with the local recycling programs across the state.

The winner of the 2003 John L. Smith Pesticide Container Recycling Award of \$2,000.00 and a plaque for the outstanding recycling efforts was presented to the Martin County Cooperative Extension Service. During 2003, the county collected and estimated 5,724 pounds of plastic pesticide containers at the county landfill.

Pesticide Disposal Assistance Program

In 1976, the North Carolina Pesticide Board adopted regulations prohibiting the disposal of any hazardous waste, including pesticides, in sanitary landfills. The NC Pesticide Disposal Assistance Program, created by the NC Dept of Agriculture & Consumer Services, provides the public a legal, free-of-charge, environmentally acceptable mechanism to dispose of unwanted or unusable pesticides. The Pesticide Disposal Program is contained within the Food and Drug Protection Division, but is not a regulatory part of the Pesticide Section.

The Pesticide Disposal Assistance Program disposes of pesticides collected at designated single day disposal collection sites and at permanent household hazardous waste collection sites across the North Carolina. In 2003, the Pesticide Disposal Assistance Program supervised the collection and disposal of 109,020 pounds of pesticide waste. A total of 68 single day disposal events were organized by NCDA&CS during 2003. NCDA&CS also assisted 18 counties in disposal of pesticides collected at permanent household hazardous waste (HHW) sites. A participant must notify the Pesticide Disposal Assistance Program prior to taking unwanted pesticides to a HHW site.

DEFINITIONS ADOPTED

Table I lists the analytical results of formulation samples based on the following:

“PASSED” - signifies that all active ingredients were found to be present at acceptable levels based on the label guarantee.

“FAILED DUE TO DEFICIENT ACTIVE INGREDIENT” – signifies that one or more active ingredients fell significantly below the guarantee. Such products are placed under “Stop Sale Order” and are removed from the market place.

“FAILED DUE TO EXCESSIVE ACTIVE INGREDIENT” - indicates a significant excess of one or more active ingredients. Since such formulations could be harmful to the user and/or result in excessive residues, these products are placed under “Stop Sale Orders” and are removed from the market place.

Table II lists the analytical results of microbiological samples based on the following:

“PASSED” - indicates that the product was effective in killing the specific microorganisms guaranteed by the product label.

“FAILED” - indicates that the product was ineffective in killing the specific microorganisms guaranteed by the product label or that bacterial contamination of the product was found.

Table III lists manufacturers that had products placed under “Stop Sale Orders” due to the following:

“UNREGISTERED” - signifies that the product was not registered at the time it was found by a pesticide inspector in the marketplace. Any such product is required to be registered prior to release from a “Stop Sale Order.” A delinquent registration penalty is also assessed against the manufacturer.

“MISBRANDED” – indicates that the labeling of a pesticide product failed to conform to federal and/or state requirements.
