

WHERE ARE THEY NOW?

Monitoring firewood-vectored invasive forest pests in North Carolina

-  Laurel Wilt Disease
-  Spotted Lanternfly
-  Thousand Cankers Disease
-  Emerald Ash Borer
-  Spongy Moth Quarantine
-  Asian Longhorned Beetle

These devastating pests can easily be moved in or on firewood. The use of local or treated firewood is important to reduce the spread of invasive species in our state's forests.

The N.C. Forest Service asks that you use local firewood to prevent the further spread of Forest Pests.

The N.C. Forest Service is a division of the N.C. Department of Agriculture and Consumer Services. Steve Troxler, Commissioner
