

Agricultural Road Repair/Stabilization

Definition/Purpose

Repair or stabilization of existing access roads utilized for agricultural operations, including roads to existing crop fields, pastures, and barns.

Policies

1. The road shall be for agricultural use only.
2. The road must be an existing road eroding in excess of 5T or a segment of a road delivering sediment directly to a stream.
3. Structural geotextiles shall meet the requirements of "Construction Specification 217 – Geotextiles" and "Interim Material Specification 592 – Geotextiles"
4. If the land is converted to residential or commercial uses during the maintenance period, the cost share contract shall be considered out of compliance.

AGRICULTURAL ROAD REPAIR/STABILIZATION	
Maintenance Period	10 YEARS
BMP Units	Lin Ft
Required Effects	ACRES_AFFECTED - (drainage area) SOIL_SAVED - (Gully Worksheet)
