

ADDENDUM TO NC-ACSP-2 (CONTRACT AGREEMENT)

TO: DIVISION OF SOIL AND WATER CONSERVATION

FROM: SWCD NAME

SUBJECT: NUTRIENT MANAGEMENT PLAN REQUIREMENTS

1. The Cooperator agrees to implement nutrient management on designated acres of the plan for three years. Acres which have previously received cost share funds for nutrient management, acres already under non-cost shared nutrient management and acres to which animal waste is applied are excluded from the cost shared acres of the plan unless the farmer is applying for the Precision Nutrient Management BMP.
2. The Cooperator agrees to take and submit for testing soil samples of these acres before each cropping sequence, with a minimum sampling requirement of twice during the three-year period. The Cooperator agrees to supply the District with a copy of the soil analysis reports.
3. The District certifies that the nutrient management plan meets NRCS standards, was developed by an acceptable nutrient management planner and is a permanent part of the cooperators District file.
