

Association Executive Director's

Report to the Commission

November 2024

2025 Legislative Items

We will be working through the Annual meeting committees to develop 2025 needs. This will be the long session when the new budget is developed, but there will be pressure due to the amount of funding needed for disaster assistance.

Feral Swine Assistance

We are working with the NC Department of Agriculture and Consumer Services Vet division on their trapping efforts. Moving forward, we will work on training materials for Districts with an interest in housing traps for use in Districts with a feral swine problem. Feral swine are a serious concern due to disease issues that could impact the swine industry.
