

Association Executive Director's

Report to the Commission

January 7, 2024

2024 Legislative Items

This will be the short session of the General Assembly. We are continuing our legislative efforts but anticipate an abbreviated session this year with the big election coming in the fall. Here at the Annual Meeting, we will adopt our 2024 priorities and move forward with accomplishing those items.

Basic Training for Soil and Water Conservation Supervisors

We offered our first of the 2024 session yesterday. The three February sessions will follow.

Grow More

We are partnering with the National Wildlife Federation to offer Outreach Training this year. We are planning four sessions across the state and will have an introductory presentation as part of our Milton Heath Lecture series on Tuesday.
